RE: Perchlorate stakeholder forums

Number of pages including this cover sheet = 3

MESSAGE:

Dale,

Greetings from Boston! Thank you for agreeing to help with "getting the word out" to a few people who I have talked with recently about the forum in Phoenix. Since our email server was down this past weekend, and I couldn't do it myself, I appreciate your assistance.

Attached is the latest version I have with me of the flyer on the perchlorate forums. It would be very helpful if you get a copy to the people listed below, or perhaps just send them the basic information on purpose, date/time/location, registration information. I am finding it helpful to include the short paragraph on "what is perchlorate?"

Karen Medville, ASU-West, email: medville@asu.edu

George Martinez, ASU-West, email: gmart@imap4.asu.edu

Michelle Dehaan, City of Scottsdale, email: mdehaan@ci.scottsdale.az.us

Also, in today's call you asked for Paula Bruin's telephone number. It is 415/744-1587. I think the idea of a joint press release by Region 9 and ADEQ is a good one. Please let me know if there is anything I can do to assist.

I am checking voicemail regularly while here at the national EPA community involvement conference, so please feel free to leave me a message if you have any questions.

Thank you,
